DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 12-16, drawn to a method of identifying an ADP-glucose receptor agonist or antagonist, classified in class 435, subclass 7.1.
- II. Claims 7-11 and 17-20, drawn to a method of identifying an ADP-glucose receptor ligand, classified in class 435, subclass 7.1.
- III. Claim 21, drawn to a method of altering signaling through ADP-glucose receptor, classified in class 435, subclass 7.1.
- IV. Claims 22-24, drawn to a method of ameliorating an ADP-glucose receptor associated condition, classified in class 514, subclass 2.
- V. Claims 25-33, drawn to a composition comprising an isolated ADP-glucose receptor polypeptide and ADP-glucose, classified in class 514, subclass 2.

2. The inventions are distinct, each from the other for the following reasons. Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP §806.04, MPEP §808.01). In the instant case the different inventions are drawn to completely different methods each having completely different method steps and having completely different outcomes. Thus, all the methods are exclusive.

3. Invention V are related to Inventions I-IV as product and process of use. The invention can be shown to be distinct if either or both of the following can be shown:

- (1) the process for using the product as can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP §806.05 (h)). In the instant case, the receptor polypeptide in the composition can be used to produce an antibody.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for a single group is not required for any other group, restriction for examination purposes as indicated is proper.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (l).
